

The ÉrMe Hálózat, „Value Preserving Network” creates a platform for Christian business men, entrepreneurs and managers to meet. In the midst of the club nights and other events, the members of the network can learn – and exchange experience – about the **ways of working as a Christian within the economy**, the means of synchronizing their faith and their business activity. Furthermore, the events give an opportunity for the members to network and cooperate with one another and **make mutual business plans** on the lines of shared values, personal friendship and trust. The goal of ÉrMe furthermore is **social engagement**: people in need are regularly supported, as well as other valuable public initiatives.

The mission statement of ÉrMe – „**Business is more than pure profit**” – reflects the view of our members, namely that the target of a business activity is not only financial benefit, but also **the service of common good** respectively. This motto also expresses the fact that its members regard their business activities as valuable ones, would like to bring profit and **run a successful entrepreneurship**.
