

Arete Consultancy Ltd. in Budapest aims to invest into such digital enterprises that contribute to the welfare of a wider scope of the society. These start-up companies operate in the fields of health and sport, labour and education, mobility and city development, as well as financial digital technology. Arete Investment Ltd. seeks both the International market's most outstanding talents, best ideas for future prospects, as well as partners that are open for innovation and abide to real values, respectfully. Arete typically invests into early-phase (pre-seed) start-ups, whilst not only investing, but also providing professional mentoring and business-development consultancy.

The focus of Arete is global, however it solely searches such enterprises, who already have at least a prototype-phase product or service, along with a good and stable team. Arete focuses on the joint work of talents with a wide range of professional backgrounds, on the collaboration of enterprises with different nationalities and on the quest of women entrepreneurs.
