

The **Servitor Pro Multis Nonprofit LLC.** was established in 2009 with the cooperation of the Benedictine, Franciscan, Jesuit and Piarist Order and the Portus Buda Group Ltd. At the foundation of Servitor and during the development of our services, our leading goal was the recognition that the key factor in creating a more sustainable operation of the ecclesiastical institutions and charity organisations lies in the joint forces within the market.

For over a decade we have been striving to assess the most important maintenance needs and requirements of ecclesiastical, charitable and non-profit organisations in the circle of the church, and adapting to these demands, our goal is to find and develop the best possible, most favourable market opportunities and services. The „bipolar” ownership structure combines the solid values of the orders with extensive market experience.

Servitor maximally seeks to implement in both its professional and personal affiliations the dominical values and businesswise ethical conduct, respectfully. We would like to minister and provide service to the ecclesiastical organisations in a way that they can perform their work and mission in a more effective way with our collaboration.

At this moment in time we support **more than 200** religious, monastic, as well as Roman Catholic, Greek Catholic, Protestant, Lutheran **organisations**, along with the whole institutional network of the Hungarian Maltese Service, the ÉTA Association and more than ten religious orders, **at more than 500 premises.**
